Customer Reviews

Info on cards is really good. Along with LabCe and Harr's MLS Review, this is a sure way to succeed when taking the MLS certification exam. That being said, the material the cards is made of is not the best. It's just barely thicker than a sheet of printing paper. A 3x5 index card is thicker. Do not expect these to last long in your bag without tears, folds, and wears. It's not helped that the large metal ring provided to bind the cards has hinges that don't necessarily fit the premade holes on the cards. To make matters worse, there isn't a box or container included to hold the cards if you don't want to use the ring. Considering the cost of the cards, the stock of the cards should be improved or laminated.

I purchased these cards through the bookstore at my school and I love them. I studies only from the cards and I passed both the ASCP technician and AAB technologist exams the first time. Now I have decided to take the ASCP MLS exam and wanted to update my purchase. The new cards are smaller and come with a ring to attach them to. More convenient and portable than the originals. These cards are a must have for anyone who is either a student or recent grad prepping for their exam

For some reason I was thinking that these cards would be like flash cards, but they are not. They are pretty much an entire book, just on tiny cards (front and back of each) instead of longer pages. That being said, I do think these will be useful still in studying for the MLS exam. They contain a ton of information, and no questions. At this point I feel that they may contain a little too much information, but I do like being able to take out a section at a time to carry in my purse to review throughout the day when I may have a few minutes to spare. And yes, as others have noted these are very thin and will likely wear apart quickly.

Definitely a SUPPLEMENTAL learning material and when I mean that, it means you have to READ your med lab sci books to be able to decipher some tidbits of info you're going to encounter especially if you've been out of school for sometime (though clinical experience helps with condensation of what you've learned). Excellent point: summary of relevant info into tables & illustrations w/c otherwise would be a nightmare to separately read in books. Overall, a good material in reviewing for the ASCP, though I would recommend co-studying other materials.

I expected these cards to be much sturdier than they are. They come with a large ring so you can flip through the cards on the ring, but they won't last long getting flipped around on that ring because they are made of regular copy paper instead of some sort of card stock. These will rip out with regular use. The only reason they get 3 stars from me instead of only 2 is due to the fact that they do contain a lot of useful information that makes them handy for exam prep.

Looked through the cards and the contents were very good. I am actually preparing for a director level exam and I think the materials included were useful.

I bought the Kindle version. I was able to view cards from my phone and computer using the Kindle App. These cards are very good reference cards for working as a MLS and for passing boards! Highly recommend as an aid. Cards are very organize and it is easy to look up information.

Great cards! Helped my son passed the board !
