Today's Technician: Basic Automotive Service And Systems, Classroom Manual

Synopsis

Gain a competitive edge in the automotive industry with this updated classroom/shop manual set that explores the basic theories of operation behind each automotive system and the diagnostic, testing, and repair procedures that accompany them. Assuming no prior knowledge of automotive technology, the book addresses fundamental skills and maintenance, as well readers of all levels and backgrounds. This exciting new edition includes increased usage of metric measuring instruments, expanded information on brakes, including Active Braking systems and their link to Active Suspension systems, and enhanced coverage of electronic stability and electronic power steering, including four-wheel steering. This all-new content is built into the strong foundational knowledge that its previous editions are known for, making TODAY'S TECHNICIAN: BASIC AUTOMOTIVE SERVICE & SYSTEMS, 4TH EDITION a resource that you won't want to be without.

Customer Reviews

Cliff Owen, retired, is the former Program Coordinator of the Automotive Technology program at Griffin Technical College in Griffin, Georgia. He holds an Associate's Degree in Applied Science (A.A.S.) and is an ASE Master Automotive Technician. Mr. Owen has also been certified as an instructor for Electric Vehicle Maintenance by York Technical College in Rock Hill, SC. --This text refers to an out of print or unavailable edition of this title.

Package came on time Comes with two books I will come back

Came on time at a reasonable price. Other than that got no more to say. Have a great day. Will come back again.

This is a great book that goes over the general operation of a car...it does not teach you how to repair anything...this is a nice preparation book for more advanced studies....one great aspect of the book is that it tells you where things are located on a car instead of just talking about them...easy to read....will give you confidence as you go into advanced studies...well written book
