If I had read books like "When I Crossed No-Bob" when I was a teen, I would have learned so much about history. It's really too bad that I waited this long. This was a beautifully written book. The main character's voice shines through. I swear you can hear her voice and her accent. I am a middle school Language Arts teacher and have already passed this book on to students who are enjoying it just as I did. I think that modern society sometimes takes for granted the simple things in life and how education is so important. It's also a good reminder for all educators that technology is constantly changing the way students learn. The technology in this book was in the form of maps and books. Mr. Frank's students hadn't seen maps before. It warmed my heart to see the students so excited over the maps and I was reminded how much students love anything digital. Beautiful book! This will stay with me for a long time.

Addy is abandoned by her mother when she is only 12, yet she has her head on straight enough to muddy through the forces of good and evil which close in around her. Not unlike Scout in "To Kill a Mockingbird," Addy rises to the truth when she needs to and acts with courage and determination, with a maturity that most adults around her fail to exhibit. Torn between her family's bad reputation and her own need for independence, Addy shows that being abandoned by your family can be a positive when the right surrogate parents are at hand. Great post-Civil War snapshot of the Deep South, complete with white sheets and very mean men. Suitable for middle- or high schoolers and an easy airplane read for me.

I have read "How I Found the Strong" by Ms. McMullan and enjoyed this book even more. My grandchildren loved it. The author's writing skills get better and better. Write one for us older

readers!
