Customer Reviews

Collins UK is a leading information-led publisher of illustrated and narrative nonfiction.

We bought 3 maps of Ireland for driving through the countryside. This one was BY FAR the most helpful and most accurate, with all of the grades of highways from freeways to tiny village "roads."

Unless you have blind trust in technology, then bring a map with you. We used google maps (with mobile wifi unit rented from the car company) which was fine--until it wasn't. It's impossible to get a sense of scale from a smartphone, which only a paper map can deliver. And then there are those places that only God can see you, beyond the reach of wifi or satellites. Getting lost in Ireland is part of the adventure--and it's thrilling as long as you have a map in your glove box to guide you back when you're ready.

It's a pretty big map and well detailed. We used it multiple times when the GPS was a little confused. The only downside is it's large and difficult to fold while in the car. The driver basically can't be driving when you fold it back.

We will use this map this summer in Ireland. It has come highly recommended.

Came in handy for driving around the country. Wished it had a little more detail of Dublin streets. That place is hard to navigate with all the one-way streets, no-left-turn here and hard to find street-signs (we finally figured out they're on the corner buildings, not posts :)).

Got for a trip to Ireland later in the year.

Heading back to Ireland for a second trip. This map will be great to use. I plan to highlight our route and add notes so that we can share it with friends who want our recommendations. GPS can be so expensive; this is a much better way to tour Ireland by car.

The map is very detailed; however, I would suggest purchasing a map with a ring binder because it would make it easier to use and navigate.
