An unmatched reference on water issues

Peter H. Gleick is President of the Pacific Institute for Studies in Development, Environment, and Security in Oakland, California, and is a recipient of the prestigious MacArthur Fellowship for his work on water issues.

This book was required reading for a water conservation class I took. It was easy to read and really opened my eyes to how water is undervalued and in danger of running out. The book was delivered on time and in the condition promised.

book for a friend they enjoyed it for their class

Well informed data, and introspect on this issue. :)

Excellent!

Dr. Gleick, founder of CA's Pacific Institute, is a brilliant and devoted scientist who has dedicated his life to the study of water. One of the Institute's major contributions continues to be the highly regarded Water and Conflict Chronology, which traces the history of water as a tool of war and conflict, explores the nature of those conflicts, and provides citations and data in an interactive system, set of maps, and database. I highly recommend readers go the Pacific Institute website at www.pacinst.org for reams of free publications and resources in addition to these other books available.<http://pacinst.org/issues/water-and-conflict/>

It seems an utter violation of humanity and or Earth that this book is only available as paper product that consumes an enormous amount of water, and is not available on Kindle.
