Doodle Yourself Smart . . . Geometry (Doodle Books)

Synopsis

Do you remember the Pythagorean theorem? How about quadratic equations? If it's been years since your last geometry class, these terms may sound like they're from another language. But there's an easy way to get back up to speed. All you have to do is doodle yourself smart! Doodle Yourself Smart...Geometry is the perfect gift for students of all ages, whether they're brushing up on key mathematical skills or learning for the first time. This fun and educational book includes more than 100 doodles and problems covering key concepts and ideas. With ample space for your own doodles, the book will help you unleash your creativity while teaching you about angles, triangles, parallel lines, and more. And you don't need to be an expert artist to learn! Scribble your way to smarts! Doodle Yourself Smart...Geometry is the easy, low-key way to unleash your creativity and become a math master!

Sonya Newland is a writer and editor of educational and reference books, apps and website content. She has worked on material for a range of age groups, including mathematics home learning titles for primary students, series on environmental issues and health for Key Stage 3, GCSE Science revision guides and study guides for the International Baccalaureate Diploma. Doodling from an early age, Sonya can be seen on many a sunny afternoon whiling away the hours with her cat Minus, creating puzzle ideas just for fun. Back in her element, she grasps the doodle concept with both hands and settles down to the challenge.

Well, I really wanted to love this. Geometry is so interesting. I expected this to be more drawing. A lot of the problems were going to just be doodling numbers. You will need to know Geometry to do this book. It does not explain things.

harder than expected for my advanced math students

I expected this to be kid friendly. This is geared more for older teenage children (high school level) and adults.

Use this in my classroom for quick mind breaks.

perfect for GED classes to get students to "see" geometry-makes instruction a lot more fun for the teacher also !

This was a Christmas gift for my 9 year old grandson, and he loves to draw, said it was "awesome".

Ã Â•Ã Great to keep kids engaged. On a long 400 mile trip me and my daughter enjoyed the problems. There are lot of white space where kids can doodle and explore the problems. Ideal for 10-12 year olds. A sample problems on the book areÃ Â•Ã If length of diagonal of a square is $2 \cdot \sqrt{2}$, what is the area?
