Excellent.....thank you.

This single sided map contains a lot of history and information without being too verly cluttered with facts or notations. It shows the main research facilities on the continent and is useful for school programs and just for information. A folded map, it is too bad that they did not also use the reverse to provide other information or show maps of the more highlighted areas of the ice, the Vinson Massiff, McMurdo and Dry Valleys, or the Antarctic Peninsula.

This map is just what i was looking for. I am interested in the history as well as geography of Antarctica and this map points out the significant historical explorer's routes as well as the modern basecamps and scientific stations. The coloring is a little bland but includes mountain ranges with some contrast.

This is a really cool map of Antarctica for somebody who is interested in the Southernmost Continent. It is full of great info. It is hanging up in my room.
