Customer Reviews

I got this to play on the Piano. It is great. The negative reviews are consistent in saying that the guitar tabs are wrong. So, if you're playing this on Piano, you will be fine. If you're playing the guitar, you may want to find another music book.

Tabs are not correct at all trust me, house of cards in particular is horrible. No point to this book don't waste your money.

Great product, delivered in perfect conditions. I'm really really satisfied, also for the price, definitely the cheapest on the market for this specific product.

As with many books of sheet music for popular music these days, there is more than one edition. If you need the piano/vocal book, look for ISBN #0739051067 (or 978-0739051061). If you are looking for the guitar tab edition, look for ISBN #0739051075 (or 978-0739051078). Even though groups the reviews together, the books are different. With a little research and effort, you're sure to find just

what you're looking for. Mine is the piano/vocal edition, and so far it looks great.

Most of these tabs aren't even close to being accurate, which is disappointing since they have the radiohead seal of approval. The notes are correct, but are not even remotely close to how the band plays them. I have all of the other tab books and they are wonderful, this one however is a big disappointment. I don't recommend wasting the money, much more accurate tabs are freely available online.

As a previous reviewer said, the tabs/guitar music in this book are not correct. Playing the songs as written in this book will get you a sound that is close, but it is not how the songs are played on the album. Anyone with a good ear who can hear how the songs are played will be disappointed for sure. Some of the songs have parts that are correct, but the majority seems to be 'dumbed down' or something. This is unfortunate because this album is amazing.

if you want to play radiohead music on the piano, some of the songs are a tad difficult, so not really for the beginner. i really got this for 15 step but there are a few other songs that are pretty good on the piano.

Amazing transcription, especially the piano section. All the songs sound brilliant, even though some are slightly more advanced, they are all great to play.
