Learn Beginner Spanish With Learn Spanish Audio Book: Over 5 Hours Of Audio Included

BEGINNER SPANISH

Learning Spanish Like Crazy

BY PATRICK JACKSON

Synopsis

This program consists of both the first five audio lessons from the new and improved Learning Spanish Like Crazy level one program and the first five audio lessons from the original or classic version of the Learning Spanish Like Crazy level one program. Learning Spanish Like Crazy will teach you how to speak authentic Latin-American conversational Spanish. I have only used native Spanish speakers in this program to make sure that you develop an authentic Latin-American Spanish accent. If you are not concerned with learning how to speak real everyday conversational Spanish, then this program is probably not for you. I understand that there are people who only want to learn enough Spanish to communicate with a hotel clerk, restaurant waiter, flight attendant, etc. in a Spanish-speaking country. But there are others who want to learn enough Spanish so that they will be able to develop meaningful friendships and relationships with Spanish speakers, and improve communication with Spanish-speaking in-laws. If the latter category best describes you, then this program is for you. The Learning Spanish Like Crazy system also puts a major emphasis on improving pronunciation. Some people have a natural ability that allows them to quickly develop native like pronunciation. You probably know someone who is the type of person that I am referring to. We have all seen or heard someone who can imitate the voice of a famous politician, actor, singer, or other celebrity so well that you could almost be fooled into thinking that you are actually hearing the famous person speak. Unfortunately, I was not born with that talent. I had to learn certain techniques to improve my Spanish pronunciation. Those same pronunciation-enhancing techniques are incorporated in this program. So if you've struggled to improve your Spanish pronunciation in the past, after completing this program don't be surprised if native Spanish speakers begin to compliment you on your pronunciation.

Customer Reviews

To get the most out of these Spanish lessons, you will have to download the 10 MP3 audio lessons which are included at no extra charge. Each of the 10 lessons are about 30 minutes long. So I received about 5 hours in recorded audio Spanish lessons. Although the audio lessons are great for learning how to speak authentic conversational Spanish, I personally feel that the ebook was useless. The author even tells you to just ignore the ebook and just use the audio lessons if you really want to know how to actually speak Spanish and develop a real Latin American Spanish accent. I totally agree with the author. I don't think it is possible to reach a conversational level in Spanish just by reading ebooks, let alone being able to improve your pronunciation without using any auditory materials. You have to actually practice the language by listening and speaking. I must warn you that this company's Spanish products are somewhat addicting.

Don't be surprised, if like me, you find yourself purchasing everything that they release. And as soon as they start releasing some products for other languages, they can count me as their first customer. I feel this way because their products are really the best for learning how to speak friendly, informal (but proper) Spanish. I have also started to get compliments from a couple of Spanish-speakers who attend a learning-foreign-languages meet-up group with me.

They've complimented me on how well I pronounce everything in Spanish. I really can't tell you if they are just giving me the compliments to encourage me to study more or if they are really sincere compliments. But I enjoy receiving the compliments nevertheless. My final advice, download the 5 hours of audio Spanish lessons that are included with the purchase of this book, and completely ignore the ebook. You'll be very happy with how much conversational Spanish you have learned.

This is a great program for learning conversational Spanish. I mean the type of Spanish that the natives actually speak. The other Spanish programs which I had purchased always gave me the feeling that they were teaching me Spanish specifically for tourists or what the creators of the program thought I should learn. No, that's not what I had wanted to learn. I have always wanted to learn the authentic stuff. And with this course I am finally learning the type of Spanish that I always wanted to learn. Real conversational Spanish. The speakers in this course are not just any old native Spanish speakers. They sound more like professional native Spanish-speaking voice-actors. I can tell because I used to work in the voice-over field. Not only does the fact that they're

professional actors and actresses help keep me interested and entertained but hearing the accent from someone who has been professionally trained as a voice actor really helps me to develop the accent of a native Latino. As someone pointed out already, make sure you get the audio program at Audible.com or at . My wife signed up for the free trial at Audible.com so we were able to get the audiobook to this course for free with our free trial. In my opinion, the ebook by itself really doesn't make much sense without the audio. I still recommend getting the ebook because there are links in the ebook to sign up for their free webinar which is taught by a Colombian Spanish professor who teaches "New Millennium Spanish" as opposed to 20th Century Spanish. Get this program. You'll be happy you did.

I have tried several Spanish programs and this one is by far the most engaging and interactive. Nearly every program I've come across uses the same listening and repeating method. But not with this program. With this program, the instructor really keeps the listener engaged by constantly asking questions. After you give your answer in Spanish, a native Spanish speaker then says the correct answer so that you can repeat after him or her to check your pronunciation. You'll have to get the audio book of the program here at . But it's worth it, especially if you take advantage of the free trial offer that Audible is offering at the time of this review. The creator of the program says that you don't even need to buy the ebook. I bought it anyway and found it very helpful because it helps me visually reinforce my new vocabulary words.

This is a great resource for learning conversational Spanish. I am a Spanish tutor and I am always looking at different Spanish programs, not only to recommend to the students who I tutor, but also to help me improve my teaching methods. I have recommended this program over and over again to several of the students who I teach. Unfortunately, most have ignored my advice. But the couple of students who followed my advice and listen to the program on a daily basis, I can hear a marked improvement in their Spanish pronunciation and listening ability. I will continue buying programs from this author because this program and some of the other programs by him have helped me immensely when it comes to developing an effective teaching method.

I must say that I am enjoying learning Spanish with this method. As one reviewer already pointed out, one of the best things about this program is the engaging and interactive method used. This listen and repeat method is ideal for a busy person like myself who never has time to be tied to a computer and the only time I have to learn Spanish is when I am doing something else.

I've said this before in a product review I made for another language-learning product by this same company. And now I am going to say it again. This company makes the absolute best audio language-learning programs. Not only are their prices extremely affordable, their teaching-system is highly effective.

I am happy I stumbled upon these Spanish lessons. I like using the audio program with the ebook. The creator of the program recommends that you try to use the audio program without the ebook. But I feel my confidence to speak Spanish is increasing by using the two together. I can certainly feel my Spanish becoming more fluent.
