I bought this book (along with the other books in the series) to go along with our 4th grade unit on animal adaptations. My students LOVE them! I can hardly keep them on the book shelf of my classroom library! The illustrations are charming and even inspired several of my students to create their OWN illustrations of themselves with animal body parts. The author did a great job of teaching an important science concept in a funny, engaging way. I love these books so much that I just pre-ordered the next book in the series, which is coming out right as school is starting. These books would make a great addition to ANY collection, whether it's at home or at school or whether it's for learning or just for fun. You'll enjoy them for sure!

Great book! Kids love it and it's an AR book. Lots of interesting information, in a very appealing presentation. Item as described .

A fun way to teach animal adaptations.

I bought the "What if..." series to read to my students as unique examples of informational text. My students loved listening to the books. Very entertaining and well written.

Love this book series! My kindergarteners loved reading and completing fun responses about this book.

My kids love all these series.

Fun book. My four year old likes it, but doesn't sit still long enough to finish it. At his age they really just want the to see the pictures. But, I personally think it's a cute book!

We love this series and this one did not disappoint.
