# Lifelike Animals (Drawing Made Easy)

## Synopsis

This series introduces fundamentals of drawing to new artists particularly those with real interest in skill development. Included is an emphasis on helping students find their "inner" artist.

## Book Information

Age Range: 12 - 15 years

Grade Level: 7 - 10

## Customer Reviews

Gr 7 Up "Each book is written by an artist and includes an introduction and closing that add a personal touch to the lessons found inside. Organization is typical of art-instruction guides where tools and techniques are explained first. All three titles begin with the idea that drawing freehand is one way to go, but tracing and transferring are timesavers to be taken advantage of. While *Dragons & Fantasy* focuses on tracing with the use of a light box, the other titles also include information on how to use transfer paper and photocopies to get started. *Colored Pencil* is the only one in color. It provides clear, dark outlines of the compositions (tree frog, garden gnome, fruit bowl) intended for photocopying compared with the gray outlines in *Lifelike Animals* and the complicated sketches in *Dragons & Fantasy*. All three books devote several spreads to each lesson, allowing space for clear instructions paired with illustrations reflecting steps described. *Lifelike Animals* packs a lot of detail into lessons on drawing tigers, koalas, and meerkats, but *Dragons* is the most complex. In fact, the compact design of this series is a hindrance when it comes to the fabulous details of the dragons, fairies, and Minotaur. Completed fantasy drawings fill the page, but step-by-step illustrations are

rather small. Overall, these books have enough strengths and visual appeal to earn a spot on most shelves.â “Lisa Glasscock, Columbine Public Library, Littleton, CO. (c) Copyright 2010. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc. No redistribution permitted.

The book gives several examples of different animals in different poses all done with first drawing the animal by simplifying their shapes. It demonstrates different examples of hair/skin textures. There are nine animals that are taken from line drawing to completion. Granted, these seem to be mostly animals that you would see in a zoo, unless you live near the habitat of these animals, but the applications can be done on the animal of the artist choosing. Nice paper used in the book. I purchased this book as a gift and also got one for myself.

Not really for the beginner, this book has some very nice examples of animals and would make a good refernece book for anyone who is doing animal studies.For a beginner book it would need more of the beginning line art showing how to basically construct each animal.

I love this book. I have C. F. S. and Fibromyalgia as a side effect. I sit and draw all day. This book will help you if you are looking for a subject. It is well designed. Cathi
